

Digital Perfection with Photoshop

Transforming a Good Photo into a Great Photo

Presented by digital workflow teacher and author, Mark Fitzgerald

Learn how photographers just like you are creating works of art from their best photos!

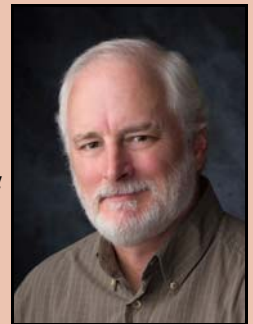

Most photographers are self-taught when it comes to Photoshop. They know how to do basic editing and retouching, yet no one has ever sat down with them and shown them the secrets to revealing the true art that is hidden inside of their favorite images. That's about to change.

Grab your laptop and join us for a daylong, hands-on workshop with Certified Photoshop Expert, Mark Fitzgerald as he reveals the techniques he's taught to countless professional photographers.

Some of the things you'll learn:

- ◆ Starting with the End in Mind
- ◆ Understanding the Non-Destructive Workflow
- ◆ Quick and Dirty Raw
- ◆ Optimizing Tonal Ranges with Curves
- ◆ Color and Color Management
- ◆ Get in control with Adjustment Layers
- ◆ Creating and using Layer Masks
- ◆ The Correct Way to Burn & Dodge
- ◆ Learn to Retouch like the Pros
- ◆ Cropping, Sizing, and Resizing
- ◆ Demystifying Resolution
- ◆ Professional Sharpening Techniques
- ◆ Presentation & Printing on Inkjet or at a Lab

Mark Fitzgerald is an Adobe Certified Photoshop Expert. He is the author of "*Adobe Photoshop Restoration and Retouching Bible*" and "*Photoshop CS4 After the Shoot*".

Mark specializes in helping professional photographers manage their workflows through workshops and private training.

To learn more about Mark and see testimonials from his clients and students, go to www.ddroom.com.

This workshop is limited to 12 photographers so that you get the attention you need. Each photographer will need to bring a laptop with some of their best photos and a copy of Photoshop CS3 or CS4 installed on it. (Trial versions of Photoshop CS4 will be available). Don't miss this chance to learn in a personal setting from an expert who's considered one of the best Photoshop, Lightroom, and digital workflow teachers in the Northwest.
